

MD. ARFIN AL EUSUF ONONNO

FULL STACK DEVELOPER

+880 1608-037801 • arfinaleusuf@gmail.com • [GitHub](#) • [LinkedIn](#) • [Portfolio](#)

PROFESSIONAL SUMMARY

Full-Stack Developer and CSE student with solid foundations in Data Structures and Algorithms. Experienced in developing web applications with **React.js** on the frontend and **FastAPI** on the backend. Skilled in designing secure RESTful APIs, implementing JWT authentication, and architecting relational databases with **MySQL** or **PostgreSQL**, with a strong focus on responsive interfaces and maintainable code.

TECHNICAL SKILLS

Languages: C, C++, Python, JavaScript
Core Concepts: Data Structures & Algorithms, OOP
Frontend: React.js, Tailwind CSS, daisyUI, HTML5, CSS3
Backend: FastAPI, JWT Authentication
Database & ORM: PostgreSQL, SQLite, SQL, SQLAlchemy
Tools : Git, GitHub, VS Code
Soft Skills: Effective Communication, Growth Mindset, Public Speaking & Presentation, Team Collaboration, Adaptability

PROJECTS

SendBD | Full-Stack Courier Service Application [Live Site](#)
A full-stack role-based courier management platform for customers, riders, and administrators, featuring secure authentication, courier tracking, rider assignment, and order management.

- **Enabled** a role-based courier management web application for Customers, Riders, and Administrators.
- **Implemented** JWT-based authentication, password hashing, protected routes, OTP-based password reset, and role-based access control.
- **Developed** courier creation, approval, rider assignment, order completion, search, filtering, sorting, pagination, and CRUD workflows.
- **Integrated** a responsive React frontend with Tailwind CSS and daisyUI, with the backend deployed on Render.

Technologies: FastAPI, React.js, SQLAlchemy, PostgreSQL, JWT, Tailwind CSS, daisyUI, Render

Baking Bliss | Online Cake & Bakery Ordering Platform [Live Site](#)
A full-stack e-commerce web application for browsing custom cakes, placing online orders, and managing user accounts.

- Built an intuitive, mobile-responsive UI with **React.js**, **Tailwind CSS**, and **daisyUI**, **Render**.
- Implemented secure user authentication and authorization using **JWT**, password hashing, and role-based protected routes for customers and store managers.
- Engineered efficient backend data handling with full CRUD operations, product search, category filtering, price sorting, and **pagination** using **PostgreSQL** and **SQLAlchemy**.

Technologies: FastAPI, React.js, SQLAlchemy, PostgreSQL, JWT, Tailwind CSS, daisyUI, Render

Library Management System | Full-Stack Web Application [Live Site](#)
A web-based platform designed to streamline library operations, including book inventory, reservations, borrowing, returns, and fine management for librarians and members.

- **Developed** a role-based library management application for librarians and members.
- **Implemented** JWT-based authentication, protected routes, and role-based access control.
- **Built** book management, reservation, issue tracking, return, and fine payment workflows.

Technologies: FastAPI, React.js, SQLAlchemy, PostgreSQL, JWT, Tailwind CSS, daisyUI, Render

EDUCATION

Northern University Bangladesh Summer 2026 – Present
B.Sc. in Computer Science & Engineering

Language

English (Conversational) | Bangla (Native)
